

2023 Winner
*Veteran Business
of the Year*

Capability Statement

Introduction

Since 1969, Petoskey Plastics has been the manufacturing innovator of blown plastic film and bags that are engineered for performance. We are an industry leader supplying the automotive, grocery, medical, recycling, retail, packaging, and construction industries with engineered solutions that meet specific needs.

We first began recycling in 1978 and have never stopped thinking green. Thanks to our exclusive, vertically-integrated 3-layer and 5-layer manufacturing processes, we are able to insert post-consumer recycled plastic between layers of prime virgin resin. We supply customers with high-performing, sustainable polyethylene products at no added cost.

We are...

an environmentally-focused film, bag, and resin manufacturer providing superior products and solutions.

Committed to Sustainability...

to be the innovative leader in environmentally-responsible manufacturing, packaging, and recycling of plastic bags and film.

Capabilities

Manufacturing Space 562,000 sq. ft.

Annual Recycling Capacity 32,000,000 lbs

Materials Manufactured

- LLDPE, LDPE, HDPE plastic film and bags
- Construction Films, Painter's Plastic
- Sustainable Shrink Bundling Film
- Can Liners, Trash Bags, Recycling Bags
- Contoured Films (Seat Covers)
- Medical Films (Gowns, Specialty Bags)

Differentiators

- Exceeds EPA Recycled Content requirements
- Meets Federal Acquisition Regulation requirements
- Stock and custom sizes and printing available
- Custom-engineered solutions
- Closed Loop Recycling available
- Products made with up to 70% Certified Post-Consumer Recycled Resins (PCR)
- Greencore® Designated CPG "Environmentally Preferable" Product
- Made in USA
