

GreenPE Film[®]

THE SUSTAINABLE OPTION, WITHOUT THE ADDED COST.

GreenPE[®] post-consumer plastic resin is made from plastic that has been recycled following its original intended use. **GreenPE[®]** is used to manufacture **GreenPE Film[®]**.

3-Layer Film

Our unique 3-layer technology allows us to combine LDPE and LLDPE into the films layers for toughness and HDPE for tensile strength while adding **GreenPE[®]** to the middle layer.

Sustainable Solutions

We engineered specialty formulas based on customer applications and requirements. We pride ourselves in providing solutions to our customers and work to improve product performance while adding up to 70% **GreenPE[®]** at a competitive price.

Quality

Through out in-house recycling facility, we control the conditions of incoming landfill-diverted plastic, ensuring the consistent quality of the post-consumer. In addition, our post-consumer recycled **GreenPE[®]** resin is third-party certified to guarantee a genuine, sustainable product.

OUTSIDE LAYER

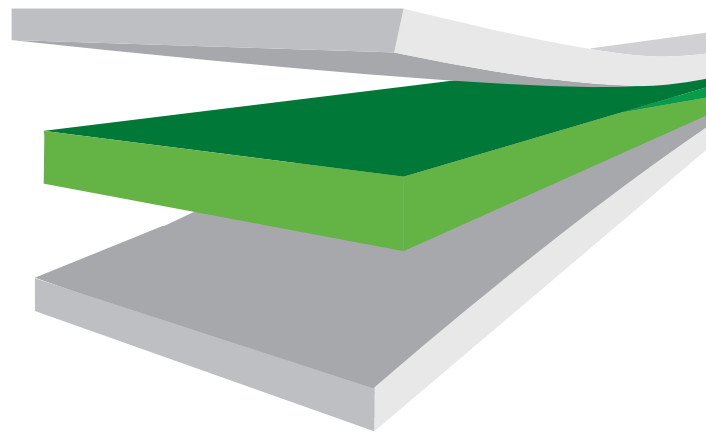

High-Strength
Virgin Plastic

INNER CORE

Post-Consumer
Recycled Plastic

INSIDE LAYER

High-Strength
Easy-Opening
Virgin Plastic

Manufactured by Petoskey Plastics [®]

Made in USA

EPA Recommended Supplier

Exceeds EPA & LEED Standards
